

## GL TYPE GRAVITY DAMPER (CHECK VALVE)

### 1. Features

The gravity damper are specially designed for sea environment, and made of stainless steel material. The gravity damper could effectively prevent hydrosphere and salt fog, and work well in this environment in HVAC duct system and keep the positive pressure in control area in order to prevent the reverse air flow.

### 3. Type & Parameter

Type	axb	L	
GL-axb	100x100~800x800	100~200	According to GB1561-79

**Note: Flange size of all fire dampers could be fabricated according to user's requirement.**
